COVID-19 SAFETY PLAN OVERVIEW

Arlington High School and Parmenter School

Project Sites

June 15, 2020

Consigli Construction continues to make safety a top priority. To ensure our employees and subcontractors remain safe and healthy, we have instituted a variety of safety protocols at the Arlington High School and Parmenter School project sites.

- Prevent people who are sick from entering job site
- Provide guidance to subcontractors
- Minimize the spread of the virus

The following is a summary of Consigli's COVID-19 guidelines and protocols. These protocols are in accordance with the Massachusetts COVID-19 Construction Safety Standards.

) Daily (start of every work day) review of protocols

- Mandatory Reporting – Sign in
- Every worker confirms no contact - Self-certification
- Temperature is taken and recorded

) Handwash Stations installed in multiple locations. Strategically placed near common touch points.

- Handwashing – encouraged often

) Daily cleaning & decontamination of surfaces, toilets and handwash stations.

) No-Congregation Rule – Social Distancing - 6'-0"

) Personal Protective Equipment (PPE) – Mask and gloves.

- Mask required if 6'-0" distancing cannot be maintained

) Procedures in the event a person tests positive for coronavirus

The project team (Town, designers, Contractors) collaborate remotely, virtual job walks (Face Time and Teams), photos and videos to document the progress of the project.

The Coronavirus pandemic has required us to increase our already heavy focus on safe working conditions. We must ensure that everyone remains diligent wearing face masks and barriers, even as we enter the warmer summer months.
