

ACCIDENT PREVENTION AND PROCEDURES

The School Committee recognizes that accidents will happen despite the fact that all normal safety precautions are observed. It is the Committee's intention to keep accidents and the resulting injuries at a minimum, while constantly striving to eliminate those conditions, which might contribute to accidents.

The School Committee will not assume financial responsibility for the medical expenses incurred by a student or parents as a result of accidental injury to a student incurred during participation in the normal school program, where no staff negligence is involved. Participation in such activities as physical education, occupational lab courses, flexible school day programs and interscholastic sports will be covered by student accident insurance provided and paid for by the School Committee.
