

FIRST AID

When a student or staff member is injured while on school property or attending a school-sponsored event, a school nurse shall provide first aid. If no nurse is available, an employee designated by the Principal shall administer first aid. If a physician's services are required immediately, a doctor who has been approved by the Committee as school physician shall be called to give emergency care only. The Arlington Police Department may be summoned to provide emergency transportation. Parents shall be notified immediately.

Parents and students shall be informed that when injuries occur at school, neither the School Committee nor the town can be held responsible.

Procedures for first aid and reporting of accidents shall be maintained and posted in all schools. Principals shall be responsible for ensuring that staff members are prepared to handle health emergencies.
