

**RESPONSE TO TELECOMMUNICATIONS AND ENERGY GENERATION PROPOSALS**

The School Committee shall ensure that a public hearing is conducted before considering any proposal for the installation of major telecommunications or energy-generation equipment on school buildings or property for commercial purposes. This does not preclude the School Department from undertaking feasibility studies or other analyses necessary to determine further steps – if any – prior to the conduct of such hearing.

Approved by the Arlington School Committee October 27, 2009
