

## Elementary class size options

The chart below indicates the options available for a given grade with a given number of students in that grade. The light grey boxes indicate classes that are bigger than our target or smaller than our target. The black (such as 25-38 students) represents grade level enrollment that has no optimal solution. We will have either classes above or below target, but not within the target range.

Number of students    1 class    2 classes    3 classes    4 classes
